

19 February 1975

MEMORANDUM FOR: Chief, Plans Staff, DD/A

SUBJECT : Office of Medical Services Communications
Requirements for Fiscal Year 1977

REFERENCE : DD/A 75-0519 dtd 3 Feb 75; subj: Communi-
cations Requirements for FY 1977-81

Other than the services currently provided to the Office of Medical Services by the Office of Communications, we have no additional requirements for FY 77. However, we would like to see at the earliest possible date, the development of a capability for:

a. Secure transmission of digitalized data to and from all stations at which we have medical technicians and/or physicians to permit transmission of biomedical data signals and other medical information, including spoken voice. The capability should exist for direct analysis of this data by computer with the results being transmitted directly back to the field station and a drop copy being printed in OMS at Headquarters. For data coming directly to OMS personnel, the analysis would be accomplished and the results returned utilizing the state of the art communication methodology at that time.

b. To transmit copies of documents to and from the same stations outlined in item (a) in a secure manner and with the protection of medical confidentiality.

MEMORANDUM FOR: [REDACTED]

SUBJECT : Communications Requirements to be
Utilized at the Earliest Possible
Date Available

The MSDO would like to see the following communications capability in the Agency for OMS utilization:

1. Secure transmission of digitalized data to and from all stations at which we have medical technicians and/or physicians to permit transmission of biomedical data signals and other medical information, including spoken voice. The capability should exist for direct analysis of this data by computer with the results being transmitted directly back to the field station and a drop copy being printed in OMS at Headquarters. For data coming directly to OMS personnel the analysis would be accomplished and the results returned utilizing the state of the art communication methodology at that time.

2. Capabilities to transmit copies of documents to and from the stations outlined in item 1 in a secure manner and with the protection of medical confidentiality.

Signed

31 JAN 1975

MEMORANDUM FOR: Deputy Director for Administration
SUBJECT : Communications Requirements for FY-1977-81
REFERENCE : OC-M-74-050, 25 January 1974

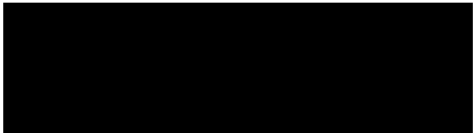

1. As requested by the reference in 1974, upon receipt of the annual Program Call, the Office of Communications would again appreciate receiving up-to-date information from the other Offices in the Administration Directorate regarding future planning requiring communications support. Your FY-1977 communications requirements and projections for 1978-81 will be incorporated into the OC response to the recent Program Call. Hopefully, some planned increases may be offset by planned decreases. Therefore, please indicate any decreases which may be planned as well as any increases.

2. It would be helpful if the specific locations and other related information concerning requirements are indicated so that detailed planning and cost estimates can be prepared. Requirements for secure voice, data and facsimile should be included, as well as record communications needs.

3. In those cases where precise forecasts are not possible this far in advance, please indicate the numbers of various types of activities and the general geographic locations.

4. It would be appreciated if the responses from your individual Directorate Offices could be consolidated and forwarded to this Office by 21 February. As you are aware, we are soliciting requirements from the other Agency Directorates in the same time frame.
